

Upgrade Checklist Docker

Upgrade from iteraplan version 6.4 to 6.5

Preparation

Task	Comment	Done
Backup database(s)	MySQL: mysqldump; Oracle: exp or expdb	
Backup Docker configuration files		
Check for data directories inside the Docker container and backup them	Per default data directories are mounted from outside the Docker container.	
Verify system and software requirements and upgrade if necessary	See online documentation for details.	

Upgrade

Task	Comment	Done
Stop and remove the iteraplan Docker container		
Database migration		
Configure iteraplan 6.5	Transfer custom settings from the old docker compose file. If LDAP is used for authentication, copy iteraplan-auth.properties.	
Empty Search Index directory		
Check file system permissions		
Start iteraplan 6.5		

Set up

Task	Comment	Done
Initialise search index	Administration -> System
