

SQL Console

The SQL console can be accessed via the URL `<iteraplan>/client/#/executeSQL`

This functionality can be deactivated via the [application property file](#), the setting is called `SQLConsole.enabled`.

 Do not use the SQL Console unless you are instructed by the iteraplan support to do so - or know what you do. By using this console all data in iteraplan might be altered or lost irretrievably.

Interface

The screenshot shows the SQL Console interface with the following components:

- 1. Editor:** A text area containing SQL code:

```
1 SELECT * FROM prod
2 WHERE pos > 1
```
- 2. EXECUTE:** A pink button to execute the SQL script.
- 3. Results:** A table displaying the results of the query:

ID_BB	NAME	DESCRIPTION	ID_PARENT	POS
215	Credit card	« nU11 »	213	3
217	Savings book	« nU11 »	213	2
218	Loan	« nU11 »	213	4
- 4. COPY:** A button to copy the results table.
- 5. Console:** A log area showing the execution status:

```
2018-01-23 16:34:40 Script executed successfully
```
- 6. CLEAR LOG:** A button to clear the console log.

1. Editor
2. SQL execution button
3. Result table (appears only if 'SELECT' script executed)
4. Copy result button
5. Log console
6. Clear log button
